

The “high energy” qualities of the CPC

Guangqiao Xing

(School of Marxism, Anhui University of Finance and Economics, China)

Abstract: Over the past 100 years, the Communist Party of China (CPC) has led the Chinese people in a hard struggle, created the “Chinese miracle” that amazed the world, and realized the great leap of the Chinese nation from standing up, getting rich to getting strong. It is no accident that the CPC has made such great achievements, and its “high energy” quality is the fundamental reason for its great achievements. The CPC has given full play to its “high energy” on the basis of the principles of the unity of objective regularity and subjective initiative, and the unity of truth and value. The CPC’s “high energy” quality is rooted in its “high moral quotient”, “high intellectual quotient” and “high emotional quotient”. Studying and exploring the CPC’s “high-powered” qualities is of great importance in enlightening and promoting the persistence and strengthening of the CPC’s leadership and the realization of the Chinese dream of the great rejuvenation of the Chinese nation.

Keywords: Communist Party of China (CPC); high energy; quality

I. INTRODUCTION

This year is the much-anticipated “14th Five-Year Plan” ending year and the new journey of comprehensively building a modern socialist country is important to promote the year, but also the 104th anniversary of the founding of the Communist Party of China (CPC) is also noteworthy. Looking back to the past, the CPC has welcomed the birth of a century-old party, and has made great achievements through thick and thin. Over the past 100 years, the CPC has led the Chinese people in hard work, perseverance, no arrogance, no impatience, and sustained struggles, and created the “China Miracle” that made the world marvel, realizing the great leap of the Chinese nation from standing up, becoming rich, to becoming strong. The Communist Party of China can make such great achievements is no accident, the author believes that the “high energy” quality is the fundamental reason for its great achievements. Obviously, this “high-powered” trait will inevitably cause a high degree of concern, people will not be able to help but ask with interest: What is the CPC “high-powered”? How is she “high-powered”? Why is she “high-powered”? Studying and exploring these questions is very important for always adhering to and strengthening the leadership of the CPC and realizing the Chinese dream of the great rejuvenation of the Chinese nation, which has a very important role in enlightening and promoting.

II. What is “high-powered” about the Communist Party of China?

As a modern Chinese word, high energy has different meanings in different contexts. In this paper, the meaning of “high energy” is that the leaders who have made outstanding contributions to the development of the society have a superb level of theoretical and practical ability. Modern Chinese history, the history of the Communist Party of China, the history of the People's Republic of China, and the history of reform and opening up tell us that the Communist Party of China takes Marxism-Leninism, Mao Zedong Thought, Deng Xiaoping Theory, the Important Thought of the Three Represents, the Scientific Outlook on Development, and Xi Jinping Thought on Socialism with Chinese Characteristics for a New Era as its guiding principle. It was born in the semi-colonial and semi-feudal period of China, and has developed and grown in all periods of revolution, construction and reform. This “high ability” has won the favor and trust of history and the people. The reason why history and the people chose the CPC as the long-term ruling party and leader of the new China is not the result of external forces, but rather the CPC's intrinsic charisma of “virtue, ability, diligence and performance”, which responds to the needs of Chinese society. The CPC's choice is not due to external forces, but to its inherent charisma of “virtue, ability, diligence and performance”, which is in line with the trend of China's social and historical development and the ardent expectations of the people. History and reality show that the CPC is a great, glorious and correct political party, and also the strongest (more than 90 million members, the largest number of members and quality), most advanced (people-centered value orientation) and most responsible political party in the world (for the well-being of the Chinese people, for the rejuvenation of the Chinese nation, for the progress of mankind, for the sake of the commonwealth of the world, and to actively promote the building of a community of shared destiny for mankind)!

III. How is the Communist Party of China “high-powered”?

The CPC has given full play to its “high-powered” role on the basis of its adherence to the principles of the unity of objective regularity and subjective initiative, and the unity of truth and value.

First, it attaches great importance to theoretical study and grasps the objective laws. Revolutionary mentor Lenin said, there is no revolutionary theory, there is no revolutionary action. Only by learning and mastering scientific theories is it possible to achieve practical success. The CPC is well aware of this, and is therefore a political party that attaches great importance to learning, is very good at learning, and is particularly diligent in learning. The birth of the CPC is itself the result of the advanced intellectuals' enthusiastic study and dissemination of advanced Marxist theories. In the process of learning, the CPC is also adept at combining Marxist theories with its own national conditions, and actively explores the path of revolution, construction and reform in line with China's actual situation. The CPC is also diligent in learning. Mao Zedong, Chen Yun, Liu Shaoqi and other revolutionaries of the older generation were all models of diligent learning. Learning is also General Secretary Xi Jinping's greatest hobby. Although he usually has a lot of work to do, he still manages to persevere in reading and studying, and learning has become his unique temperament. The collective study system of the Political Bureau of the Central Committee formed since the 16th National Congress of the Communist Party

of China (CPC) is an embodiment of diligent study at China's top decision-making level. According to statistics, the Political Bureau of the 16th and 17th CPC Central Committee has conducted 44 and 33 collective studies respectively, the Political Bureau of the 18th CPC Central Committee has conducted 43 collective studies, and the Political Bureau of the 19th CPC Central Committee has conducted 30 collective studies up to now, with an average of almost two months of study. The topics of study cover all aspects of reform, rule of law, economy, national defense, foreign affairs, strict governance of the Party, ecological civilization and so on. In the process of learning, the CPC adheres to the ideological line of starting everything from reality, linking theory to practice, and seeking truth from facts, following and grasping the laws of development of nature and human society, and laying a solid theoretical foundation for correctly and efficiently transforming the world.

Secondly, it scientifically and fully utilizes its subjective initiative, and exhausts all its efforts and energy for the benefit of the people. The CPC is good at empowerment, that is, it is good at spreading and practicing the “high and positive energy” of scientific socialism. “The Communist Party, like the sun, shines brightly wherever it goes” is a lyric in the classic red song ‘The East is Red’, which graphically represents the glorious image of the CPC uniting and leading the Chinese people to overthrow the three mountains, establish a new democratic and independent China, and then carry out socialist construction in a pioneering manner. Since the reform and opening up, especially since the 18th Party Congress, the CPC has continuously carried out self-revolution and self-renewal with a strong sense of responsibility and worry, advancing with the times and the world, showing the charm of the sun in the new era. Xi Jinping Thought on Socialism with Chinese Characteristics for a New Era is the brilliant light of the sun in the new era, shining brightly wherever it goes (strict governance of the Party, unprecedented anti-corruption and anti-blackmail: “tigers and flies” together; carry out the “fight against blackmail”). (the strict rule of the Party, unprecedented anti-corruption and anti-blackness: “tigers, flies and flies” are fought together; the operation of “combating blackness and eliminating evil” is carried out to solve the problem of “darkness under the lights”, etc.), where the light shines, where the wealth is (the task of poverty eradication and building a moderately prosperous society in all aspects has been accomplished), where the light shines, where the power is strong (the overall strength of China's country has been significantly increased, and has stepped up to a new level), and where Where beautiful (Xi Jinping's idea of ecological civilization has been deeply rooted in people's hearts and minds, and the construction of a beautiful China has achieved remarkable results)!

The CPC's “high and positive energy” unites and leads the Chinese people to firmly embark on the “right path on earth”, progressing step by step and traveling steadily to the distance. At present, socialism with Chinese characteristics has entered a new era, and the curtain of building a modernized socialist country has been opened. The CPC unites and leads the Chinese people in the journey of “the great rejuvenation of the Chinese nation”, and the dream of “a modernized socialist country that is rich, strong, democratic, civilized, harmonious and beautiful” is on its way. The dream of “a rich, strong, democratic, civilized, harmonious and beautiful modernized socialist country” is increasingly becoming a reality. In addition, the CPC's “high and positive energy” also radiates and leads people from all over the world to embark on the “right path” on earth. The CPC has always actively advocated and practiced the concepts of peaceful coexistence, harmonious development and joint progress among

all countries in the world. The CPC actively promotes the construction of an open world economy and a community of human destiny, facilitates changes in the global governance system, unequivocally opposes hegemonism and power politics, actively promotes the construction of the “Belt and Road”, and has achieved remarkable results in combating epidemics and preventing epidemics in a scientific and highly efficient way, and so on. All these “great deeds” and “great strokes” have contributed Chinese wisdom, Chinese programs, Chinese power and Chinese achievements to the world's peace and development and the cause of health. It can be said that the CPC is the messenger of world peace, the embodiment of justice, the mentor of development and the commander-in-chief of struggle. Under the influence of the “high and positive energy” on earth, people of all countries in the world will gradually embark on the “right path” on earth, and with joint efforts and cumulative efforts, they will ultimately cultivate the “high and positive fruit” of communism on earth.

IV. Why has the Communist Party of China achieved “high energy”?

The CPC's “high-powered” qualities are rooted in its “high moral quotient”, “high intellectual quotient” and “high emotional quotient”.

The CPC's “high moral quotient” is embodied in the following: the people are the most important thing, and the common wealth is the most important thing. The CPC takes the values of Marxism as the guide for its actions, and has always adhered to the basic position of Marxism during the different periods of revolution, construction and reform. This basic position is to take the liberation of the proletariat and the liberation of all mankind as its mission, to take the free and comprehensive development of human beings as a beautiful goal, to take the people as the center, to do everything for the people and to rely on the people in everything. ② The interests of the people are no small matter. The CPC always asks the people about its politics, needs, and plans, truly coming from the people and taking the people's happiness, satisfaction, and promise as the criteria for testing the success or failure of its work. The essence of socialism with Chinese characteristics built by the Chinese Communist Party under the leadership of the Chinese people is to liberate the productive forces, develop the productive forces, eliminate exploitation, eliminate polarization, and ultimately achieve common prosperity. Under the strong leadership of the CPC, after years of efforts, China will eradicate absolute poverty for the first time in human history in 2020, and is destined to go down in the annals of human development as the country with the largest number of people living in poverty reduction in the world, as well as the first country in the world to accomplish the United Nations Millennium Development Goals. Since then, the Chinese people have been striving on the road of socialism with Chinese characteristics.

The CPC's “high intelligence” is reflected in its belief in science and the creation of miracles. The CPC believes in Marxism, which is unchanging, unchanging in wind and rain, firm and steadfast, and takes the worldview and methodology of Marxism as a guide for action. This is because Marxism, as the truth, is scientific, revolutionary, practical, people-oriented and developmental, and is a powerful ideological weapon for understanding and transforming the world. Under the guidance of the Marxist concept and methodology, the CPC has led the Chinese people to create world-rare military, economic and social miracles during its long struggle.

First of all, the Long March is a world-unrivaled miracle! How arduous, how strong and how glorious it was! Such a feat has never been seen elsewhere in the world and will hardly be seen in the future. Secondly, the founding of New China is the second miracle created by the CPC! It may be difficult for foreigners to realize that with only millet and rifles, the Japanese invaders could be driven out and the 8 million troops of Chiang Kai-shek, who had American imperialism as his backing, could be defeated. Once again, the fight abroad against the U.S.A.R. Korea was the first face-to-face contest between New China and imperialism under extremely difficult conditions, and created a miracle in the world's military history in which the weak overcame the strong! Finally, the Fourth Plenary Session of the 19th CPC Central Committee stated that in the seventy years since the founding of New China, our Party has led the people to create a miracle of rapid economic development and a miracle of longterm social stability that is rare in the world! The Chinese nation has ushered in a great leap from standing up, getting rich to getting strong, and created the world miracle of peaceful rise!

The CPC's "high emotional intelligence" is embodied in its courage to assume responsibility and diligence in struggle. The latest version of the Constitution of the Communist Party of China (CPC) emphasizes at the beginning: "The CPC is the vanguard of the Chinese working class, and also the vanguard of the Chinese people and the Chinese nation." What is a vanguard? Pioneer is the leading core of the cause of socialism with Chinese characteristics, representing the development requirements of China's advanced productive forces, representing the forward direction of China's advanced culture, representing the fundamental interests of the broadest number of people in China. Pioneer is to be courageous. For the sake of the people must bear in front, the more difficult to walk the road, the more party members to walk in front of the masses; the more difficult it is the can, the more party members to block in front of the masses. Pioneer is to be diligent in the struggle, suffering in the front, enjoyment in the back. Happiness is all out of struggle. Struggle is our party's fine tradition and consistent style of work, because of generations of Chinese communists of the painstaking struggle, only today our country's world-renowned development achievements, with the people's increasingly better happy life.

"The long road is as strong as iron, and the steps we take now are from the beginning to the end"! Let us closely unite around the CPC Central Committee with Comrade Xi Jinping as the core, firmly grasp the "four consciousnesses", firmly grasp the "four self-confidence", support the "two establishments", and practice the "two safeguards", work with one heart and one mind, drum up energy, join hands, walk in the same direction, and walk a good path. We will work with one heart and one mind, gather all our energy, join hands and walk in the same direction, take every step in the journey of building a socialist modernized country in an all-round way, and make new and greater achievements!
